Introduction

Congratulations on your purchase of the Intelligent Xtension Recorder (XtR) SD Call Recorder!

The SD Recorder is part of an exciting range of cost-effective Digital call recorders from Intelligent Recording.

This quick reference guide will take you through the installation and setup of the SD Recorder software and help you begin recording your calls quickly.

Note: There are various support manuals, programs via Intelligent Recording's web site www.usbcallrecord.com including 'Live Chat' technical support to help get you started.

CAUTION!

The use of monitoring, recording, or listening devices to eavesdrop, monitor, retrieve, or record telephone conversation or other sound activities, whether or not contemporaneous with transmission, may be illegal in certain circumstances under federal or state laws. Legal advice should be sought prior to implementing any practice that monitors or records any telephone conversation.

Mac Compatibility

The Xtension Recorder desktop application software supplied will work on recent Apple systems including Intel based OS X 10.5 and later (Leopard, Snow Leopard, Lion) systems. Note: earlier versions and PowerPC are not supported.

Product Registration

It is very important you register your SD Recorder with us.

Registration provides you with free technical support for your SD Recorder hardware and software as well as free upgrades to the latest version of SD Recorder firmware and the Xtr Desktop software supplied with the SD Recorder.

HOW TO REGISTER

1. Visit www.usbcallrecord.com and click register.
2. Enter your details on the form provided.

Once registered, you will be ready to begin using the SD Recorder.

Software Installation

Your SD Recorder comes complete with applications that allow you to manage your recordings on your Mac.

Before you install your SD Recorder you must install an application which will allow XtrSDRecorder and Xtr Desktop to run. We supply a 30 day evaluation version of this software; a full license can be purchased online.

Insert the SD Recorder CD, and open the Mac folder. Double click on the crossover-demo-xx.x.x.dmg file. If your CD does not include the crossover file, you can download it from:

<http://www.codeweavers.com/products/crossover/#dl/>

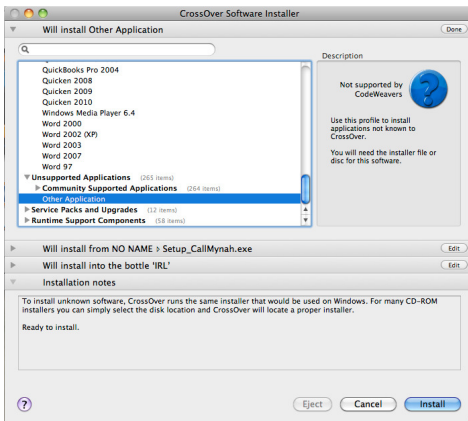

Drag the CrossOver icon to the Applications icon to install CrossOver.

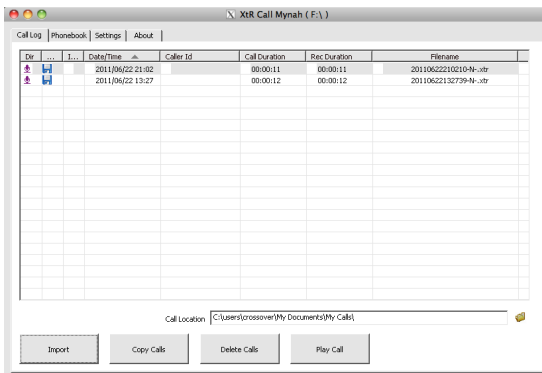

In the CrossOver window, click Install Windows Software:

Scroll down to Unsupported Applications, click Other Application. Select the installer from the SD Recorder CD (Mac\Setup_SDRRecorder.exe),

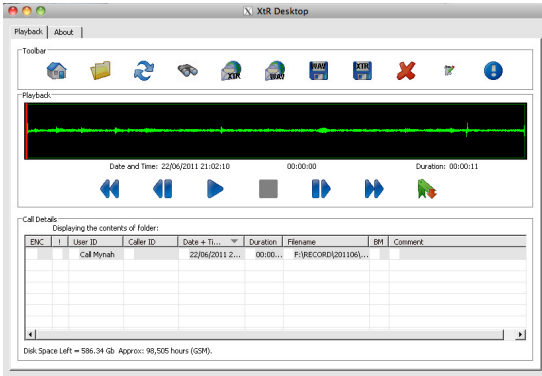

Click Install. The SDRRecorder installer will run, and will install the applications. When it has finished it will launch XtrSDRecorder. To finish the installation, exit the XtrSDRecorder application.

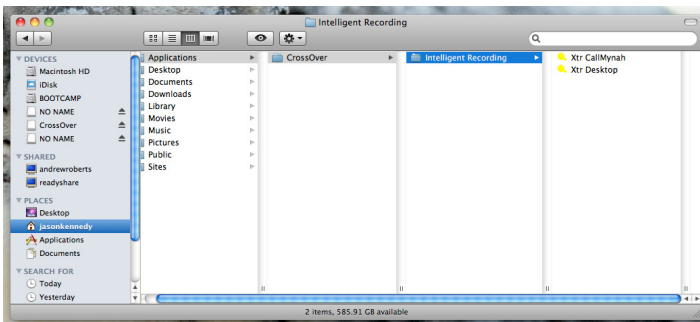

The installer installs two applications:

Xtr SDRRecorder –View and change Settings and Phonebook entries, view, backup, and delete Calls.

Xtr Desktop – Play and manage calls on your Mac.

Both of these applications are installed to the Applications->CrossOver->Intelligent Recording folder.

CrossOver is supplied as a 30 day trial, which you must purchase to continue using the SD Recorder applications. We offer a discount code for the purchase of CrossOver. Special prices are available on request for large numbers of licenses.
